terday, in response to a query relative to the action of the board on the smoke nuisance, said that a committee had been appointed to confer with the smelter men to ascertain if the choking fumes could be abolished and what the probable cost would be. This committee will submit a report next week. Mr. Mantle believes that the undertaking will be found to prove as formidable as the completion of De Lesseps big ditch. "In the first place," said Mr. Mantle, "it will require an outlay of \$200,000 at the least calculation, and then the work will be only an experiment. Then again, it would prove a difficult matter to find \$200,000 loose change lying around the camp of Butte. The smelter companies could not afford to disburse this amount for the convenience of the Butte public, as their profits would materially decrease, and it is a matof the Battle puone, as their profits would materially decrease, and it is a matter of grave doubt whether the eastern owners of the big smelter would care to spend that amount for other peoples' comfort. THE ROCKY FORK ROAD.

County Near at Hand.

Gov. Hauser said to an INDEPENDENT reporter yesterday, that work on the Rocky Fork & Cooke City railway is going torward rapidly. The weather thus far since grading was resumed has been all that ould be desired, and there is every assurance that the work will be completed within forty days. The bridge over the Yellowstone has already been finished, and at last reports two miles of iron had been laid. The grading is being rapidly done, and the

track-layers follow closely upon the graders. The coal fields which this road is to reach are probably the largest in the terri-tory, and yield the best quality of coal yet discovered in the northwest. The cor-poration controlling the fields has con-tracted to furnish the railroad company with 1,500 to 2,000 tons daily for shipment. Rolling stock has been secured, and will be ready for use as soon as the track is laid.
